DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Rhee.

Rhee's Figs. 4 - 5 and Figs. 6-7B illustrate two embodiments both illustrating a 4 – 2 compressor having a full adder with dual XOR/XNOR gates (e. g. gates 31, 32,34, 36, 52 and 54) and a 2-1 multiplexer (e.g. elements 33, 37, 62, 64, 66 and 68). Each compressor circuit also includes two pass logic 2-1 multiplexers (e.g. elements 33,37, 62, 64, 66 and 68).

Claim Rejections - 35 USC § 112

3. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The elements recited fail to be clearly related to the previously recited elements, e.g. The “full adder circuit” of claim 2 fails to be clearly related to the “adder circuit” of claim 1. In claim 3 the phrases “the XOR/XNOR cell” and “the full adder” lack clear antecedent basis. The language of lines 2-6 of claim 3 does not effect to connection recited on lines 1-2. Claim 4 is clear mis-descriptive. For what is the “control signal” of claim 6 used for?

Drawings

4. Fig. 1 is required to be labeled “Prior Art”.
